Brainstack Technologies is proud to announce its official partnership with **Omni Remotes Singapore** for their sentinel range of solutions in India for the year 2021.

ABOUT SENTINEL

Sentinel is the workplace companion for health and safety in the pandemic age.

This end-to-end solution for contact tracing and safe distancing is:

- **Simple:** Sentinel is easy to deploy, with minimal infrastructure required.
- **Safe:** Alerts users when safe distances are breached, stores contact data.
- **Secure:** Limited data (e.g. employee ID) collected, no GPS tracking.

Reader

Scanner

USE CASES

- **Hospitals** where person-to-person interaction is frequent, and access to information during outbreaks is critical.
- **Offices, colleges** and **schools** with limited resources to monitor people movement and interactions across meeting rooms and common areas.
- **Manufacturing units**, **Warehouses, shipyards**, and **food production** industries, where large worksites and numbers of workers make it difficult to ensure compliance.
- **Hotels, resorts & cruise ships**, with difficulties in managing high traffic & large number of short-term visitors.

COMPONENTS

- **Sentinel Shield Compact wearable**, the Shield issues audio and visual warnings, and logs any contact, whenever safe distance is breached.
- **Sentinel Scanner** when placed in a strategic location detects the configured Shields over a large area, and relays information to the Reader.
- **Sentinel Reader** can be plugged into a PC and, alongside the App, used to monitor the fleet of deployed Shields.
- **Sentinel App:** The Sentinel App allows administrators to inquire the contact duration between two individual employees, among other features.

OFFICIAL AUTHORIZED PARTNER

We are pleased to appoint

Brainstack Technologies

as our commercial partner in India for the
Sentinel range of solutions for the year
2021
